Beautiful Eyes

Press Release

Immediate Release

“The Eyes Have It”

Miami Beach, Florida, June 9, 2014: Naturally beautiful eyes; bright, alert, protected skin, firm in appearance, with the thinner, sensitive eye area skin hydrated and moisturized is simply achieved through either of two product offerings from www.beautopia.com.

Available either individually, or in the very intelligent aging and prevention kits available (Series A or Series B**) the two products manage, heal, and rehydrate, reduce puffiness and eliminate dark circles to provide youthful well nourished, healthy, contoured skin.

The “**Multi-Peptide Firming Eye Gel**” has superior antioxidant protection which brightens skin, protects eyes from free radical damage and reduces dark circles for an alert appearance. It is “packed with peptides” for a smoother appearance, and prevents collagen and elastin deterioration, and rehydrates.

The “**Marine Firming Eye Magic**” is infused with potent peptides and anti-puffiness actives that visibly reduce swollen eyes, allows for increased circulation, lymphatic exchange and reduces wrinkles by feeding the surrounding skin tissue down to the stem cell or basal layer.

Whichever product chosen, for prevention on younger skin OR for age management on more mature skin, both boosts and reinforces collagen production, firms, tightens and smoothes the eye contour area. For more information or to purchase please visit www.beautopia.com or either www.walgreens.com or drugstore.com. For company information, email to info@beautopia.com or call 305-742-5600.
